Mobile Generation - Android developer at international mobile marketing agency in the heart of Amsterdam

MobGen

Are you a talented or experienced Android developer, looking to join a fast-growing international mobile marketing agency and use your programming skills to develop Android applications?

Join MobGen's talent program in Amsterdam for an exciting period of six months. Your skills will be tested while working on cutting edge applications, games and innovative solutions for Android.

Mobile Generation (MobGen) is a full-service mobile marketing agency that helps national and international brands with the implementation of creative marketing activities into the mobile channel such as crossplatform applications, online social media applications and HTML5 mobile banner campaigns.

MobGen has local offices in Amsterdam, Toronto, and São Paulo. MobGen's headquarters is situated in the very heart of Amsterdam where an energetic and creative team of 50 people work in an informal atmosphere. MobGen works for clients such as Shell International, ABNAMRO, Bosch, Heinz, Dutch National Lottery among others.
