

Mobile Generation – Jr. iPhone / iPad developer in an international mobile marketing agency in the heart of Amsterdam

MobGen

Do you want to become a Jr. iOS developer? Looking to join a fast-growing international mobile marketing agency to use your skills and develop iOS applications?

You can join an exciting iOS team in Amsterdam, working on cutting edge applications, games and innovative solutions for the iPad and iPhone.

Mobile Generation (MobGen) is a full-service mobile marketing agency which helps national and international brands, broadcasters and publishers with the implementation of creative marketing activities into the mobile channel. Therefore you should keep in mind providing ideas for building 'mobile communities', development and construction of 'branded' mobile sites and mobile applications (e. g. for iPhone or Android), providing 'mobile response' (SMS) solutions for 'traditional' campaigns, developing social media campaigns (Facebook, Hyves, etc.), developing and implementing mobile banner-campaigns, mobile media planning & buying, etc.

MobGen has branches in Amsterdam, Sydney, Toronto, Madrid and São Paulo. The headquarters is situated in Amsterdam (Marnixstraat) where the team of experienced employees works in an informal atmosphere.

You can find more information on: www.mobgen.com

Job description

Responsibilities

- Work with Creative and Technical internal teams and external agencies to deliver new implementations and features across a growing portfolio of mobile trading products;
- Technical design and timely implementation of device-optimised mobile applications and User Interfaces for on-line use according to requirement specifications and the company's design, coding and performance tuning standards
- Research and development of current and emerging mobile and mobile web technologies
- Working closely with other development units in the company to share information regarding application subject matter and know-how

Job requirements

- Full-time
- Possess strong Object-Oriented development experience;
- Strong analytical and creative problem solving skills;
- Motivated (hungry to learn), organized and responsible personality (dare to come with own initiatives);
- Solid understanding of Cocoa/UIKit frameworks and the iOS SDK;
- Experience with developing for other operating systems (e.g. Android or BlackBerry) is a big plus;
- Experience with Mobile Web technologies including HTML 5 and CSS3 is a big plus;
- Good knowledge of English spoken and written;
- Communication and social skills (humor is a plus)
- Experience, knowledge are more important criteria than education level.

We offer

- Opportunity to become part of a rapidly growing industry – pioneer!;
- Great deal of personal responsibility;
- Chance to turn your knowledge into practice for the broad audience;
- Workplace in a beautiful location in Amsterdam (10 minutes from Central Station)
- Learning from an experienced top-team;
- An energetic and committed team;
- Pleasant working environment;
- Intern allowance
- Launch period: January 2012
